

The Basics of Light-Curable Adhesives

Email Course | Day 1

Thank you for signing up for the "Basics of Light-Curable Adhesives" email course.

Before we get started on today's lesson, we wanted to go over what you can expect over the next week.

In the coming days, you will get an email from us every day with a different lesson. Look out for our emails that start with Lesson #. It's important to follow each email consecutively so you don't miss anything.

Some lessons will include an educational give-away at the end of the lesson. We really want to encourage you to download them. They are great tools designed to give you more information on the topics and to help you understand the lessons better.

After a lesson, if you decide you'd like to continue on and read more than one lesson a day, there is a link to the next lesson at the end of the page. We've also included a link to previous lesson just in case you'd like to go back and review anything. We'll still send an email with the next lesson link the following day so you'll have it in the future if you need to go back.

If this all sound good to you, [let's dive into the first lesson!](#)
